She is involved in nursing research and has been published in multiple peer-reviewed journals. Dr. Bautista has presented on multiple clinical topics and nursing professional development courses.

## COURSE OVERVIEW

---

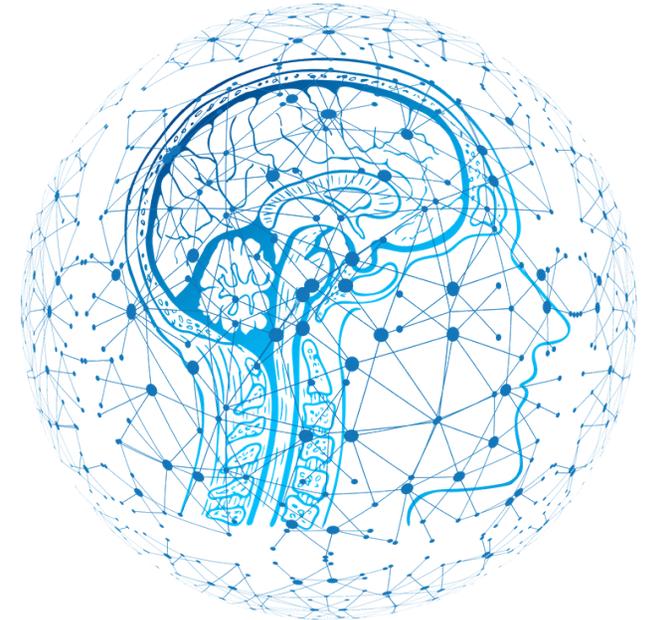

Stroke is a leading cause of disability and 5th leading cause of death in the United States. The healthcare field is evolving in treatment options and stroke care. Staff nurses are oriented to caring for the stroke patient. Nurses have enough experience to apply their knowledge to take the AANN Stroke Nurse Certification. This course's interactive discussion will educate nurses working with stroke population on up-to-date care and treatment and for these nurses to become certified healthcare providers showing their expertise. RN's will obtain the unique body of knowledge necessary for stroke nursing practice, increase overall awareness of stroke care, and support the hospital and the stroke program's mission of providing excellence in healthcare. Certification can improve patient outcomes

### Learning Objectives:

1. Review the anatomy, physiology, and etiology related to stroke syndromes.
2. Identify the interventions available during the hyper-acute phase of caring for a stroke patient.
3. Discuss the acute care needs of the stroke patient.
4. Describe the importance of post-acute care for the stroke patient.
5. State the importance of primary and secondary preventative care for stroke.

### Learning Outcome:

After the completion of this review course, at least 80% of the attendees will take their certification exam in neuroscience.

## Stroke Certification for Registered Nurse (SCRN) Review Course

---

**Virtual Event  
August 16, 2021**

**Presented by**
